## FOR IMMEDIATE RELEASE

### **MARLO Announces Purchase of Building for Expansion of World Headquarters**

Racine, WI, June 4 2020 – MARLO announces the purchase of the former Warren Industries property at 2201 South Street, directly next door to MARLO World Headquarters at 2227 South Street for the future expansion of their operations.

With the acquisition, MARLO will add 64,200 square feet of space to the company's existing 75,000 square feet of manufacturing and office space. Future plans include adjoining the two buildings together to create a larger, fully integrated campus for the design and manufacturing of residential, commercial, and industrial water treatment equipment and systems. The purchase of the building and land demonstrates MARLO's commitment to reinvesting in the business and solidifying its roots in the Racine community.

"You only have one chance to acquire a neighboring property so once we knew it was for sale, we needed to seize the opportunity. Once we configure the building to our needs, it will give us a significant increase to our production capacity for future growth, shorten our delivery times, improve quality, attract new customers, and create jobs." said Steve LaMere, MARLO's President and Chief Operating Officer.
